The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-25 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Okada et al. Note “determining that a print-to-mail format document has been printed” (detecting a result of a process result in the facsimile machine or printing machine, see abstract), “identifying attributes of the print-to-mail format document” (St 102 of figure 18 identifies attributes of address and notifiable result information from print data) and “generating notification information that identifies that the print-to-mail format document has been printed” (notifying the detected process result to the e-mail address of the notification destination node, see abstract) as claimed in exemplary claim 1 of the applicant and taught by Okada et al
